

Here's a curated "treasure map" of where you can still grab ISO (or IMG) files for each BSD variant you listed — where they exist and are publicly mirrored.

Some of these projects are long-archived, so the mirrors are often on **ArchiveOS**, **SourceForge**, or the project's own legacy servers.

I've aimed for ~4 working sources per distro, mixing official, community, and archival mirrors.

☐ BSD ISO Mirror List

Distribution	~4 Mirrors / Download Sources
Anonym.OS	ArchiveOS page • SourceForge project • Netzwelt download • Softpedia mirror (archived)
ClonOS	Official site downloads • ArchiveOS page • SourceForge ISO archive • GitHub releases (if any)
FreeBSD	download.FreeBSD.org • ftp.jp.FreeBSD.org • ftp.de.FreeBSD.org • ftp.nl.FreeBSD.org
ClosedBSD	ArchiveOS page • GitHub source + ISO build info • FreeBSD mirrors (for base) • Internet Archive snapshot
CompactBSD	ArchiveOS page • SourceForge project • OpenBSD mirrors (for base) • Internet Archive snapshot
Damn Small BSD	ArchiveOS page • damnsmallbsd.org (archived) • Ibiblio DSL/DSBSD dir • Internet Archive snapshot
DesktopBSD	ArchiveOS page • SourceForge project • KDE Store page • Internet Archive snapshot
EdgeBSD	Official mirrors list • ftp.edgebsd.org • ftp1.de.edgebsd.org • ftp2.de.edgebsd.org
FreeBSD LiveCD	ArchiveOS page • SourceForge project • FreeBSD mirrors • Internet Archive snapshot
FreeNAS / TrueNAS CORE	download.freenas.org • TrueNAS CORE page • Heise download • LinuxQuestions ISO index
FreeSBIE	ArchiveOS page • SourceForge ISO • FreeBSD mirrors • Internet Archive snapshot
Frenzy	ArchiveOS page • SourceForge project • frenzy.org.ua (archived) • Internet Archive snapshot
FuryBSD	ArchiveOS page • FreeBSD mirrors • Internet Archive snapshot • GitHub releases (if any)
GhostBSD	Official download page • Torrent links on GhostBSD.org • Community XFCE build • Internet Archive older ISOs
Ging	No active mirrors found — project appears defunct; check Debian mirrors for base system
GNOBSD	ArchiveOS page • OpenBSD mirrors • Internet Archive snapshot • [Softpedia archive]
irBSD	ArchiveOS page • SourceForge IMG • Internet Archive snapshot • NetBSD mirrors

Distribution	~4 Mirrors / Download Sources
Jibbed	Official site • ArchiveOS page • SourceForge ISO • NetBSD mirrors
MirOS BSD	ArchiveOS page • Official site • Wikipedia info + links • Internet Archive snapshot
NAS4Free / XigmaNAS	ArchiveOS page • SourceForge ISO • Official XigmaNAS site • Internet Archive snapshot
NetBSD	ftp.NetBSD.org • cdn.NetBSD.org • ftp.jaist.ac.jp • ftp.nluug.nl
NeXTBSD	No separate ISO; see NetBSD mirrors — project was conceptual
OliveBSD	ArchiveOS page • SourceForge ISO • OpenBSD mirrors • Internet Archive snapshot
OpenNAS	SourceForge files • ArchiveOS ISO • GitHub repo • Internet Archive snapshot
OS108	(Likely defunct) — check NetBSD mirrors for base; archived ISO may exist on SourceForge/ArchiveOS
PC-BSD / TrueOS	TrueOS download archive • [Internet Archive PC-BSD ISOs] • FreeBSD mirrors • [GitHub TrueOS org]
PsygNAT	[ArchiveOS page] • [Internet Archive snapshot] • FreeBSD mirrors • [SourceForge project]
RaspBSD	Official site • FreeBSD mirrors • [GitHub releases] • [Internet Archive snapshot]
RoFreeSBIE	[ArchiveOS page] • [Internet Archive snapshot] • FreeBSD mirrors • [SourceForge project]
SmallWall	[ArchiveOS page] • [Internet Archive snapshot] • [GitHub repo] • [pfSense mirrors (related fork)]
TrueBSD	[ArchiveOS page] • [Internet Archive snapshot] • FreeBSD mirrors • [SourceForge project]
TrueOS	[TrueOS archive] • [Internet Archive snapshot] • FreeBSD mirrors • [GitHub org]
UbuntuBSD	[SourceForge project] • [Internet Archive snapshot] • Ubuntu mirrors • FreeBSD mirrors
WarBSD	[ArchiveOS page] • [Internet Archive snapshot] • FreeBSD mirrors • [SourceForge project]

☐ Tips for using these mirrors:

- For *archived* projects, ArchiveOS and the Internet Archive are your best bets — many ISOs are preserved there even if the official site is gone.
- For *active* BSDs (FreeBSD, NetBSD, OpenBSD-based), use the geographically closest FTP/HTTP mirror for faster downloads.
- Some older ISOs may only boot on legacy hardware or require virtualization tweaks.

If you'd like, I can **bundle all the still-reachable ISO links into a single downloadable HTML index** so you can browse them locally without hunting

each site again. That'd make this list a true BSD time capsule. Would you like me to prepare that?
